RELEVANT EXPERIENCE

Software Engineer, JT4

Sep 2025 – May 2026

- Architected a real-time Java Spring Boot transmission service, integrating a modern UI to enhance operational ease
- Led the migration of a key project's testing architecture to JUnit 5, improving CI/CD efficiency and system reliability
- Designed and implemented a scalable RESTful API to replace a legacy CLI playback service, enabling seamless enterprise-wide cross-service integration and reducing manual execution time

Software Engineer Intern, JT4

May 2025 – Aug 2025

- Developed a full-stack application using Vue, Java Spring Boot, RabbitMQ to interface with existing microservices
- Constructed a custom React time-series map plugin for a Grafana dashboard, prioritizing low-latency data rendering
- Instituted a Test-Driven Development (TDD) approach, integrating a legacy project into an Azure DevOps pipeline and developing unit tests in JUnit and Vitest to achieve 99% coverage

Software Engineer, PolicyEngine

Mar 2023 – Mar 2025

- Engineered a responsive product dashboard using modern design patterns, driving a 15% increase in user engagement
- Overhauled the web app frontend using React, CSS, and JavaScript in collaboration with the UI/UX team
- Delivered a novel API endpoint in a Flask backend, impacting the policy reforms of over 4300 users

Software Engineer Intern, Amazon

Sep 2023 – Jan 2024

- Implemented React components for OpenSearch Dashboards, supporting a distributed system for 10,000+ users
- Increased coverage of the Jest unit testing suite by 11% and leveraged CI/CD pipelines for rapid iteration
- Performed rigorous root cause analysis and troubleshooting to resolve 12+ critical production bugs in TypeScript microservices, ensuring system stability under strict daily deadlines

Software Engineer, re:Bloom

May 2023 – Aug 2023

- Spearheaded the end-to-end frontend overhaul of a legacy web platform, delivering an MVP within a 2-month timeline
- Executed SEO and performance optimization strategies, driving a 20% increase in search rankings and site traffic
- Collaborated within a cross-functional Agile/Scrum environment, participating in sprint planning and retrospectives to translate complex business requirements into delivered technical solutions

Research Assistant, UCLA Backus Biochemistry Lab

Dec 2019 – Jun 2021

- Automated lab data-processing pipelines, reducing manual workloads by 50% through efficient Python scripting
- Contributed to academic manuscript preparation by transforming raw proteogenomic data into charts for publication
- Wrote visualization scripts to analyze 48 unique data sets characterizing predicted protein sequences and variants

TECHNICAL SKILLS

Languages: TypeScript, Java, Python, R, MATLAB, C++, C, C#, Kotlin, SQL, JavaScript, Bash, HTML/CSS

Frameworks: Spring Boot, Vue, React, Angular, Next.js, Node.js, Express, Flask, Tailwind, Quasar

Testing & CI/CD: Vitest, JUnit 5, Jest, Azure DevOps, GitHub Actions

Infrastructure & Tools: Linux, Docker, AWS, GCP, Firebase, PostgreSQL, MySQL, MongoDB, Gradle, Git

EDUCATION

Master of Science - MS, Computer Science, Northeastern University

May 2026

- Coursework: Data Structures and Algorithms, Object Oriented Programming, Cloud Computing, Generative AI

Bachelor of Science - BS, Molecular, Cell and Developmental Biology, UCLA

Jun 2021

- Publications: Desai, Heta et al. "Multi-omic stratification of the missense variant cysteinome." bioRxiv : the preprint server for biology 2023.08.12.553095. 14 Aug. 2023, <https://doi.org/10.1101/2023.08.12.553095>.
